Unique Solutions

ICG couples technology and expertise to create unique property tax solutions for our clients.

ICG has taken our best practices from our real estate servicing model and combined them with common asset tracking processes to create a revolutionary service for the Manufactured Housing Industry.

In addition to delinquent notifications and escrow reporting and payments, ICG processes begin with the sale and follow through loan payoff. Our process eliminates costly delays and errors associated with assessment, abandonment and movement of chattel and home/land properties.
